

NICKYS GARDEN OF HOPE

ARCHITECT OF RECORD

Nicky's Garden of Hope is developing a new supportive and inclusive housing and business model for adult residents living with intellectual or developmental disability and their families. The vision of the organization is to create a robust, affordable and self-sustaining solution that allows IDD adults and their families the peace and security to live a full and dignified life.

WHAT WE DO: THE ELEVATED STUDIO

Based on sustainable design principles, the campus creates a built environment that plays an important role in the supportive development of the individual and the network of the community. Occupying a former agricultural property, the campus will take advantage of the terrain and environment to maximize the use of the land, while minimizing the disruption to the existing woodland and open areas.
